Disclaimer:

This list contains permanent generator identification numbers for all Massachusetts generators of hazardous waste and waste oil that have registered with or notified th Massachusetts Department of Environmental Protection (MassDEP) of their hazardous waste activities as defined in 310 CMR 30.00, the Massachusetts Hazardous Waste Regulations. This list is updated monthly and does not reflect additions made since the most recent update. If data for your facility is missing or incorrect, or if you have any questions about this list, please contact the MassDEP hazardous waste program at: 617-292-5898.

- Note: Facilities that expect to generate hazardous waste on a continuing basis must apply to MassDEP for a permanent generator identification number before starting to accumulate hazardous waste or waste oil.

A transporter may not collect hazardous waste or waste oil from a generator without a valid generator identification number.

The information in column G refers to the listed facilities' self identified generation status for Massachusetts identified wastes as the table below.

Hazardous Waste No.	Substance
MA00	Hazardous waste designated as such pursuant to 310 CMR 30.144. The manifest shall include (1) a description of the most hazardous constituent of the waste, and (2) a referenc to the date when the Department designated the waste as hazardous, and (3) a reference to the office of the Department which designated the waste as hazardous. For example: "Alizarin mixture, 3/7/85 NE".
MA95	Universal waste shipped on a hazardous waste manifest by a licensed hazardous waste transporter.
MA97	Class A regulated recyclable material (including, but not limited to, specification used oil fuel) that is shipped using a hazardous waste manifest.
MA98	Off-specification used oil fuel that is shipped using a hazardous waste manifest.
MA99	Not hazardous waste. This designation is to be used only for material that is not hazardous waste and that is shipped using a hazardous waste manifest.
MA01	Waste oil[1] that is not otherwise hazardous waste pursuant to 310 CMR 30.120 through 30.136. The listing for waste oil includes unused waste oil, used waste oil, or any mixture thereof.
MA02	Wastes which contain polychlorinated biphenyls (PCBs) in concentrations equal to or greater than 50 parts per million.[2]
MA04	Waste generated in the manufacture of paint (*e.g.*, oils, shellac, varnish, stains, laquer, latex, enamel, alkyds, urethanes, acrylics, casein) which is not otherwise regulated as hazardous waste pursuant to 310 CMR 30.120 through 30.125 (characteristics of hazardous waste) or 30.130 through 30.136 (lists of hazardous wastes) if: (1) The paint is formulated with one or more ingredients which are listed as hazardous constituents in 310 CMR 30.160; or (2) The paint is formulated with any ingredient which contains 1% or more by weight of hazardous constituents listed in 310 CMR 30.160.

[1]Waste oils whose petroleum base is white oil are not subject to 310 CMR 30.000. However, waste transformer oil is subject to 310 CMR 30.000. Incidental waste oil appearing as a film on scrap metal is not subject to 310 CMR 30.000. *See* also 310 CMR 30.200.

[2]These are also subject to regulation pursuant to the U.S. Toxic Substances Control Act. *See* also 310 CMR 30.305(5), 30.501, and 30.801.

Notice: Hazardous Waste Fees

All facilities that have notified MassDEP that they are small quantity (SQG) or large quantity (LQG) generators of RCRA-listed hazardous waste are billed annual compliance fees based on the classifications they hold on July 1. Your facility is responsible for paying this fee and formally notifying MassDEP before July 1 if you war to cancel or change its hazardous waste generator status. Lack of hazardous waste management activity does not affect the requirement to pay the fee associated witl the generator status for which you have registered. Annual compliance fees are $3880 for LQGs and $645 for SQGs.
