Massachusetts Department of Environmental Protection
Bureau of Resource Protection – drinking water program

Water Treatment Chemical Feed System Control and Alarm Testing Log

PWS Name

PWS ID#

Period

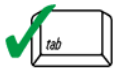
Alarms shall be checked every _____ Interval (weeks or months) (at least quarterly per MassDEP requirements)

Identified Alarm Points	Original Value	Alarm Sounded? Yes/No	Alarm Reset to Original Value Check ✓	Date	Operator Signature	Comments

PWSs with chemical treatment must test controls and alarms for critical chemical feed systems quarterly. A log must be maintained for inspection by the MassDEP DWP when requested.

You may use this sample to create a log if you do not currently have one.

Important: When filling out forms on the computer, use only the tab key to move your cursor - do not use the return key.



This Form must be kept on site and available for MassDEP review for at least 5 years.
