Subject: Executive order 562

Peter,

I would like to suggest the combination of the Sanitarian & Certified Health Officer Boards. Each license is used to practice in the public health field, where as the RS is a nationally recognized license and the CHO is Massachusetts only. I would say it is redundant to have both licenses in the same field & would make more sense if the two were combined. Even if both licenses were still given, do it through one body.

Thanks,
Matthew Brennan
