Mr. Philip Weinberg, Director  
Mass DEP SE Regional Office  
20 Riverside Drive  
Lakeville, MA 02347

RE: Cecil Smith Landfill Public Comments

Dear Mr. Weinberg,

In addition to the many emails and/or letters received by your office relating to the Cecil Smith Landfill, I respectfully submit the enclosed petition entitled "Cecil Smith Landfill: Disclosure and Safety Petition" on behalf of 318 residents from the joint communities of Dartmouth, Westport and New Bedford. Residents have signed their names requesting MassDEP to provide a comprehensive assessment of the Cecil Smith Landfill site that includes:

- (1) testing of the Shingle Island River and Colebrook Swamp—as well as soil, groundwater, and wells within 0.6 miles of the site—for contaminant concentrations;
- (2) public disclosure of MassDEP's acceptable concentrations of toxins in the proposed fill material, specifically the dredge spoils, coal ash, and construction and demolition fines;
- (3) an extension of the comment period until 30 days after all relevant information has been made available to the concerned public;
- (4) and a detailed comparison to other alternative closure options that explains why this proposal best protects the community's health and safety.

Please include the above request of all 318 residents in the record for public comments received for this project.

Respectfully,

A handwritten signature in cursive that reads "Gloria F. Bancroft".

Gloria F. Bancroft

Cc: Michael O'Reilly, Dartmouth Environmental Affairs Coordinator

Cecil Smith Landfill: Disclosure and Safety Petition

Dear Mark Dakers and the Massachusetts Department of Environmental Protection Staff,

As a community, we appreciate the extensive work MassDEP has done to involve the citizens of Dartmouth in the public comment process regarding the closure of the Cecil Smith Landfill. However, in order to protect the health and safety of the surrounding residents, we request that MassDEP provide a comprehensive assessment of the Cecil Smith Landfill site that includes

- (1) testing of the Shingle Island River and Colebrook Swamp—as well as soil, groundwater, and wells within 0.6 miles of the site—for contaminant concentrations;
- (2) public disclosure of MassDEP's acceptable concentrations of toxins in the proposed fill material, specifically the dredge spoils, coal ash, and C&D fines;
- (3) an extension of the comment period until 30 days after all relevant information has been made available to the concerned public;
- (4) and a detailed comparison to other alternative closure options that explains why this proposal best protects the community's health and safety.

However, in order to protect the health and safety of the surrounding residents, we request that MassDEP provide a comprehensive assessment of the Cecil Smith Landfill site that includes

- (1) testing of the Shingle Island River and Colebrook Swamp—as well as soil, groundwater, and wells within 0.6 miles of the site—for contaminant concentrations;
- (2) public disclosure of MassDEP's acceptable concentrations of toxins in the proposed fill material, specifically the dredge spoils, coal ash, and C&D fines;
- (3) an extension of the comment period until 30 days after all relevant information has been made available to the concerned public;
- (4) and a detailed comparison to other alternative closure options that explains why this proposal best protects the community's health and safety.

Mass DEP SE Regional Office  
20 Riverside Drive  
Lakeville, MA 02347

RE: Cecil Smith Landfill Public Comments

Dear Mr. Weinberg,

An additional 35 resident signatures were received after my submittal to your office earlier today. I am faxing their related information to be included in the record for public comments received for this project. Please note the majority of residents in this fax live outside of Dartmouth, signifying the concern that is spreading throughout the surrounding communities.

Respectfully,

*Gloria F. Bancroft*
