Alternative Path

BPI has expanded its accreditation paths by recognizing other Industry certifications that can serve as prerequisites to become BPI accredited.

The BPI Accreditation: Alternative Path for Spray Foam Policies and Procedures explains the process your company or organization will need to follow in order to acquire BPI accreditation with alternative path credentials.

BPI accepts and recognizes the following Spray Foam Certifications to establish the conditions under which a Spray Foam company will meet the necessary qualifications required to apply for BPI accreditation through an alternative path from:

Spray Polyurethane Foam Alliance, (SPFA),

Air Barrier Association of America, (ABBA)

Building Professional Training, (BPT).

Building
Performance
Institute, Inc.

The Alternative Path For Spray Foam

The alternative path is comprised of a BPI Building Analyst (BA) certification, plus one of the following:

Building
Performance
Institute, Inc.

The Alternative Path Continued

Spray Polyurethane Foam Alliance (SPFA)

A training and independent certification program, administered by the Spray Polyurethane Foam Alliance (SPFA) with a minimum designation in

Spray Polyurethane Foam Insulation Project Manager

Building
Performance
Institute, Inc.

The Alternative Path Continued

Air Barrier Association of America (ABBA)

A training and independent certification program, administered by ABBA; an installer of air barrier materials and/or systems who, in view of ABBA or its designate, has successfully completed the requirements for an Installer as set out in the QAP and has signed a license agreement with ABBA with respect to the use of the Certification Mark.
