

Errata to Section 6.3: Sexual Violence and Section 6.4: Intimate Partner Violence

Errors in the age labels used in the tables in these sections were discovered post-publication. This document contains the corrected age-labels and the corresponding corrections to the text below. Corrections are in bolded font.

SEXUAL VIOLENCE, EXPERIENCED BY MEN (Table 6.3)

-
- Men ages **55-64** (11%), were more likely to report having experienced lifetime sexual violence than men ages 35-44 (1%).

AGE GROUP					
18-24	21.7	9.1 - 34.4	†	-	
25-34	15.7	10.9 - 20.5	†	-	
35-44	17.4	12.5 - 22.3	1	0.2 - 1.9	
45-54	21.9	16.1 - 27.7	7.3	3.6 - 10.9	
55-64	20.7	14.8 - 26.5	11.1	5.7 - 16.5	
65-74	9.9	4.7 - 15.1	8.4	1.5 - 15.2	
75 AND OLDER	†	-	†	-	

INTIMATE PARTNER VIOLENCE, EXPERIENCED BY WOMEN (Table 6.4)

-
- Women ages **75** and older (6%) were less likely than almost all other age groups to report having experienced intimate partner violence.
