

Hospital Location Report (2008 – 2009)

The tables below list PSS hospital-specific performance on the percentage of eligible¹ patients who received IV-tPA for PSS hospitals in the years 2008 and 2009 combined. The tables also allow you to compare a hospital's performance to the overall performance of hospitals in its geographic location. Due to MA Department of Public Health standards for patient confidentiality, we are unable to provide hospital specific performance rates for [hospitals that received 5 eligible patients or less](#).

Regions

Five regions (Metro, Northeast, Southeast, Central, and West) represent the Emergency Medical Service (EMS) regions designated by the Massachusetts Department of Public Health's Office of Emergency Medical Services (MDPH OEMS). The cities and towns in these regions can be found at: [PSS Hospital Map \(PDF\) | Word](#)

Reading the Tables

The first table shows the number of PSS hospitals, the total number of eligible patients who arrived at PSS Hospitals and the percentage who received IV-tPA in each of 5 geographical regions. The following tables list PSS hospitals by region and the number of eligible patients who arrived at each hospital, with the number and percentage who received IV-tPA. The last column compares each hospital's performance for the administration of IV-tPA to the overall performance of all Primary Stroke Service hospitals in its region. It is listed as Equal, More Often, or Less Often, meaning that the hospital provided IV-tPA to eligible patients equal to, or more or less often than the regional rate. In order for a hospital to be noted as providing IV-tPA more or less often, the difference between the hospital rate and the regional rate has to be statistically significant². This means that the difference in the rates is unlikely to have happened by chance and more likely to be related to hospital practices. Otherwise, the hospital's rate is noted as "Equal" to the regional rate.

	Regional Peer Group				
	Metro	Northeast	Southeast	Central	West
# of Hospitals	23	13	12	9	11
# of Eligible¹ Patients	365	156	247	162	162
% Received IV-tPA	86.3%	62.2%	51.4%	64.2%	82.1%

Region 1 - West

Hospital	# of Patients Eligible ¹ for IV-tPA	Patients who Received IV-tPA		Statistical Comparison to Region
		#	%	
Baystate Franklin Medical Center, Greenfield	8	7	87.4	Equal
Baystate Mary Lane Hospital, Ware	10	†	†	Less Often
Baystate Medical Center, Springfield	42	38	90.5	Equal
