

Economic Costs of Smoking

Massachusetts Fact Sheet

In addition to the price paid in lives lost, tobacco imposes a heavy financial burden on the Commonwealth. Smoking costs Massachusetts an estimated \$6.0 billion annually.¹

- \$4.3 billion is due to excess direct health care costs;
- \$1.7 billion is from lost productivity due to premature death.

Massachusetts spends over \$10 million each day in direct medical costs related to smoking.

Massachusetts experiences \$4 million each day in lost productivity due to premature death from smoking.

Each pack of cigarettes sold in Massachusetts costs the state an estimated \$15.33 in direct health care costs and \$6.08 in lost productivity.²
